

# From Washington to the World: Protecting your Intellectual Property

EXPORT FINANCE  
ASSISTANCE CENTER  
of Washington

Each year, the World Intellectual Property Organization pursues a unique theme to celebrate and increase education, awareness and outreach about intellectual property. This year's theme is "IP and Youth: Innovating for a Better Future," focusing on our youngest innovators and highlighting that it is never too soon to start thinking about IP protection. If you want to bring your product to market, it's time to think about intellectual property (IP) protection in every country where the product may be shared or sold in. Securing IP rights can help protect inventions, ideas, designs, software, symbols, and more. The U.S. Commercial Service in Seattle is pleased offer this IP round table on June 1 to answer all your questions and concerns about intellectual property rights abroad. This webinar will be hosted by Ms. Zara Castillo, Director of the Export Finance Assistance Center of WA.
